- 70% Total ICO contribution to community.
- 15% Retained for Team, Advisors, Community, Early backers.
- 25% Retained as Reserve for future development.

Payment mechanism: ETH
Token format: ERC-20 Standard

What problem does Cubaaz solve?

Cubaaz enter the highly oligopolistic industry controlled by just 5 companies like Travelport, Sabre and Amadeus etc. These companies use their position on the market to extract the rent, e.g. Sabre vs US Airways and are accused of overcharging their clients and employing other uncertain tactics. Intermediary organizations charge 10%-25% commission and force boutique hotels into flat-rate agreements which results in high maintenance costs and low profitability for the hotels. Cubaaz is here to remove this commission and add this value to the customers.

Suppliers of Travel

Extremely easy integration to airlines, hotels, car rentals, cruise ships, tour and activity providers, home rentals and B2B at no transaction fee.

Travelers

Allow businesses to deliver the best possible customer experience. With all the aforementioned new business models, travel will be much more streamlined, personalized and there will be much more choice in terms of travel agencies that will cater to different demographics, as opposed to status-quo today, with the same company trying to satisfy needs of business travelers, backpackers, cultural, health and eco-tourists, etc.

How Does Cubaaz Work?

Cubaaz include 5 key components.

- Web platform and iOS/Android mobile App**
 - Cubaaz platform (website, mobile apps for Android, IOS and Windows phone) enabling users to search and compare available offers from all the renowned travel websites to find the best available price for hotels, apartment and car rentals etc. Our platform will also provide users access to an e-wallet and an exchange platform to users who use cryptocurrencies.
- Blockchain Technology**
 - Integrate Blockchain technology to our platform to support cryptocurrency transactions.
- Use of Big Data**
 - For the detection of individual trends and behaviors to facilitate, attract and retain the traveler by anticipating their needs and improving decision making.
- Use of Artificial Intelligence**
 - To manage the information that is generated and Improve customer relationships by Foreseeing sales, empowering workers and optimizing production processes.
- Collective Intelligence (CI)**
 - To collaboration between users and obtaining accurate results from the community.

What is the big vision

- Enabling the conditions for the perfect competition of travel suppliers and provides perfect information to buyers.
- Allowing the creation of new business models in travel industry.
- Simple rules for data exchange between suppliers and buyers of travel.
- Reducing the cost of travel for the travelers.
- Increasing the profitability of hotels by decreasing intermediary commissions.
- We facilitate travel in all of its different aspects, making it cheaper, faster, more enjoyable for consumers.
- we aim to build the payment API for marketplace integration that will become a trusted name in travel and tourism.

Use of CC Tokens

- The best payment protection features of current-generation payment systems with the innovative features of blockchain and blend in the unique features provided by our own token.
- Best features of cryptocurrencies, enabling fast transactions, lower fees and low cross-border transaction friction, enabling travelers to choose from a growing worldwide audience of travel service providers.
